

HOW CAN WE USE ARTIFICIAL INTELLIGENCE TO IMPROVE PRIMARY HEALTH CARE?

TO ADDRESS COVID-19?

We are doing a **research study** to learn how AI can be used to improve primary health care, and we want to hear your views as a provider.

STUDY DETAILS:

Can I participate? We are looking for practicing Canadian primary health care providers, including family physicians, nurse practitioners, and others. If this describes you, you can participate in this study.

Knowledge of AI is *not* required to participate.

What is involved? Attending one or more virtual group discussions

How long will it take? A session will be 1.5 hours long.

Will I be paid for my time? Yes. All participants will receive \$40 for each session they participate in.

Do I have to participate? No. Participation in this study is voluntary.

Is it confidential? Yes. No one outside the session will know if you spoke to us or what you shared. All data will be stored in a safe, secure place.

If you are interested in participating, please contact study coordinator Tara Upshaw at tara.upshaw@utoronto.ca or (416) 360-4000 (ext. 77468).

Please note that email is not a secure form of communication.

This study has been approved by the Unity Health Toronto Research Ethics Board. REB # 19-312. 09/03/2020. Contact for additional information at (416) 864-6060 (ext. 2557).
